Lab 6_1 RMMM Plan

Risk Summary	Risk Category	Probability	Impact(1-4)	RMMM
We don't finish by the deadline	Project risk	Moderate	1 - catastrophic	1
Staff fluctuation	People risk	Low	2 - critical	2
Staff illness	People risk	Moderate	3 - marginal	3
Hard drive failure	Technology risk	Low	2 - critical	4
Changes to the requirements	Project risk	Low	3 - marginal	5
Size of project is larger than projected	Project risk	High	1 - catastrophic	6

RMMM Table

Risk	Actions
RMMM1: We don't finish by the deadline	1. Communicate with the client that we are behind on the deadline and are taking extra steps to get it done as quickly as possible. 2. Try to identify as early as possible when it might happen so it can be prevented from happening.
RMMM2: Staff fluctuation	1. Cross-train staff so they are familiar with the procedures of each part of the project.
RMMM3: Staff illness	1. Have the ill staff member meet virtually, to prevent other staff from getting ill. 2. Have remaining staff members pick up slack.
RMMM4: Hard drive failure	1. Use Github version control to recover software.
RMMM5: Changes to the requirements	1. Communicate with the client for any requirements changes. 2. Check the requirements daily.
RMMM6: Size of project is larger than projected	1. Evaluate milestones frequently. 2. Stick to the MVP.
